Headnotes

PATENTS

1. Claims — Indefinite — Chemical (§ 20.553)

Claims are not indefinite under second paragraph of 35 U.S.C. 112 because of inclusion of "a radical of an aromatic diazo component," "substituted alkylene," "substituted phenylene," "alkoxy," "alkyl," "acyl," "acyloxy," and "acylamino."

2. Claims — Specification must support (§ 20.85)

Claims containing "alkyl," "alkoxy," "alkylene," and "a divalent hydrocarbon radical" are supported by specification since terms are no broader than broadest written description of invention in specification; moreover, no reason is provided why any particular alkyl, alkoxy, alkylene, or hydrocarbon group would be expected to be inoperative in environment of claimed dyes.

Particular patents—Disazo Compounds

3,838,145, Altermatt, Disazo Compounds of Low Water Solubility, claims 3 to 16 of application allowed.

Case History and Disposition:

Appeal from Group 123.

Application for patent of Ruedi Altermatt, Serial No. 838,665, filed July 2, 1969. From decision rejecting claims 3 to 16, applicant appeals (Appeal No. 144-27). Reversed.

Attorneys:

IRWIN M. AISENBERG, Washington, D. C., for applicant.

Judge:

Before MAGIL and SEROTA, Examiners in Chief, and MCKELVEY, Acting Examiner in Chief.

Opinion Text

Opinion By:

MCKELVEY, Acting Examiner in Chief.

This is an appeal from the final rejection of claims 3 through 16 of appellant's application.

The invention relates to dye compounds

Page 437

which are useful for dyeing synthetic fibers, such as fibers made from polyamides or cellulose triacetate (specification, page 13). The dye compounds are also said to "reserve wool and cotton well" (specification, page 13).

Claim 13 is the only independent claim in the case. Claims 3 through 12 and 14 through 16 depend directly or indirectly from claim 13. Claim 13 calls for azo dyes free from carboxylic acid and sulphonic acid groups having the formula:

Graphic material consisting of a chemical formula or diagram set at this point is not available. See text in hard copy or call BNA PLUS at 1-800-452-7773 or 202-452-4323.

A, B, D, X, and R 1 through R 8 are defined in the claim which need not be reproduced here.

In his answer, the examiner relies on the following reference:

Kirby 2,330,291 Sept. 28, 1943

The following rejections are before us:

- (1.) Claims 3 through 16 stand rejected under 35 U.S.C. 103 over Kirby, and
- (2.) Claims 13 and 14 stand rejected under 35 U.S.C. 112, first and second paragraphs.

1. Disposition of Rejection Based on Kirby

Kirby discloses dyes. The dyes disclosed by Kirby and the claimed dyes both have what will be referred to as a bridging group. The bridging group is attached at either end to a phenyl or substituted phenyl group

which is in turn attached to a azo group. The claimed dyes differ from the dyes disclosed by Kirby in that the bridging group of the claimed dyes is attached to the phenyl or substituted phenyl groups via an amino group, whereas the bridging group of the dyes disclosed by Kirby is attached to the phenyl or substituted phenyl groups via an amide group. According to the examiner, a representative bridging group disclosed by Kirby has the formula:

Graphic material consisting of a chemical formula or diagram set at this point is not available. See text in hard copy or call BNA PLUS at 1-800-452-7773 or 202-452-4323.

whereas a representative bridging group of the claimed dyes would have the formula:

Graphic material consisting of a chemical formula or diagram set at this point is not available. See text in hard copy or call BNA PLUS at 1-800-452-7773 or 202-452-4323.

It will be noted, with respect to the representative bridging groups that the Kirby bridging group has terminal amide groups and the bridging group of the present dyes has terminal amine groups.

The examiner holds that the claimed dyes "*" * * are so closely related to the analogous compounds of the reference as to be structurally obvious therefrom * * *." The examiner further holds that "[a]ny differences in structure [between the claimed dyes and the dyes of Kirby] would be but obvious modifications to one of ordinary skill in the art."

The record will not support the above-mentioned holdings of the examiner. There is nothing in the prior art relied upon by the examiner which teaches, suggests, or otherwise provides a motive for changing the terminal amide groups of Kirby to amine groups. Accordingly, we are unable to conclude that the examiner has made out a prima facie case of obviousness on this record. We will further note that the dyes of Kirby appear to be useful for dyeing wool and cotton (page 4 column 1, lines 39-41 and page 5, column 1, line 17), whereas according to appellant the instant dyes are said to "*" * * reserve ¹ wool and cotton well" (specification, page 13).

The decision of the examiner rejecting claims 3 through 16 under 35 U.S.C. 103 over Kirby is reversed.

2. Disposition of Rejection Based on Section 112

[1] The examiner held that claims 13 and 14 were unpatentable under 35 U.S.C. 112, first and second paragraphs, because various terms, such as "a radical of an aromatic diazo component", "substituted alkylene", "substituted phenylene", "alkoxy", "alkyl", "acyl", "acyloxy", and "acylamino" are indefinite, 35 U.S.C. 112, second paragraph. Based on his holding, the examiner concludes that one skilled in the art would not know the limits of the patent protection sought. We have carefully reviewed the examiner's position vis-a-vis that of appellant on the question of the definiteness of the above-mentioned terms. Such review leads us to conclude that the claims are definite and that one skilled in the art would know what the claims cover. Compare *General Electric Co. v. Wabash Appliance Corp.*, 304 U.S. 364, 369, 37 USPQ 466, 468 (1938).

[2] The examiner has also held that the specification will not support claims containing the terms "alkyl", "alkoxy", "alkylene", and "a divalent hydrocarbon radical", 35 U.S.C. 112, first paragraph. The claims which

contain these terms are no broader than the broadest written description of the invention in appellant's

specification. Moreover, the examiner has provided no reason why any particular alkyl, alkoxy, alkylene, or hydrocarbon group would be expected to be inoperative in the environment of the claimed dyes. Compare *In re Robins*, 57 CCPA 1321, 429 F.2d 452, 166 USPQ 552 (1970).

The decision of the examiner rejecting claims 13 and 14 under 35 U.S.C. 112, first and second paragraphs, is reversed.

Footnotes

Footnote 1. "reserve" is defined in Blackshaw et al. Dictionary of Dyeing and Textile Printing (Great Britain, Arrowsmith Ltd., 1961), p. 146, as: "To leave undyed certain fibres or threads in a union material, or in a material containing EFFECT THREADS (q.v.). The objective is achieved by selecting those dyes which have substantivity for the fibre to be coloured but which have no substantivity for the fibre to be reserved."

Applicant: ARAD, DORIT		

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/501).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The communication will be made to those Offices only upon their request. Furthermore, those Offices do not require the applicant to furnish a copy of the international application (Rule 49.1(a-bis)).

3. Enclosed with this Notice is a copy of the international application as published by the International Bureau on 18 December 1997 (18.12.97) under No. WO 97/47270.

REMINDER REGARDING CHAPTER II (Article 31(2)(a) and Rule 54.2)

If the applicant wishes to postpone entry into the national phase until 30 months (or later in some Offices) from the priority date, a demand for international preliminary examination must be filed with the competent International Preliminary Examining Authority before the expiration of 18 months from the priority date.

It is the applicant's sole responsibility to monitor the 18-month time limit.

Note that only an applicant who is a national or resident of a PCT Contracting State which is bound by Chapter II has the right to file a demand for international preliminary examination.

REMINDER REGARDING ENTRY INTO THE NATIONAL PHASE (Article 22 or 39(1))

If the applicant wishes to proceed with the international application in the national phase, he must, within 20 months (or 30 months or later in some Offices), perform the acts referred to herein before each designated or elected Office.

For further important information on the time limits and acts to be performed for entering the national phase, see the Annex to Form PCT/B 201 (Notification of Receipt of Record Copy) and Volume I of the PCT Applicant's Guide.
